

APPENDIX B

ALBERTA EDUCATION PROVINCIAL ACHIEVEMENT TEST & DIPLOMA SUMMARY REPORT

PROVINCIAL ACHIEVEMENT TESTS

2024 - 2025 marked the fourth year of Provincial Achievement Test reportable data since the 2020-2021 school year. Our data analysis approach includes the 2024/2025 PAT results and the previous three-year average at the province and division levels. The division's 2025 results are analyzed in comparison to the division's previous three-year average, the province's 2025 results, and the province's previous three-year average.

It is important to note some key items:

- The change factor provided on the table is calculated as the difference between the province's previous three-year average compared to the province's 2025 results. Similarly, the change factor for the school division is the division's previous three-year average compared to the MHPSD 2025 results. Results for individual schools will be posted on school websites within the "assurance" tab.
- In 2024/25, Grade 6 Science, French Immersion Language Arts and Literature (FILAL), and Français Langue Première et Littérature (FLPL) provincial achievement tests were not administered.
- In 2024/2025, schools piloting the new Grade 6 Social Studies curriculum were not required to administer the provincial achievement tests in May and June 2025.
- Participation in the Provincial Achievement Tests was impacted by the fires in 2022/23 and 2023/24. Caution should be used when interpreting trends over time for the province and those school authorities affected by these events.

Key analysis can be found in the tables at the end of this document. Our approach to analysis is as follows:

- First, we compared the school division 2025 result against the division's previous three-year average in both acceptable and excellence standards.
- Second, we compared the provincial 2025 result against the provinces' previous three-year average in both acceptable and excellence standards.
- Third, we compared the school division change factor against the provincial change factor.

DIPLOMA EXAMINATIONS

2024 - 2025 marked the fourth year of diploma exam reportable data since the 2020-2021 school year. Our data analysis approach includes the 2024/2025 diploma exam results and the previous three-year average at the province and division levels. The division's 2025 results are analyzed in comparison to the division's previous three-year average, the province's 2025 results, and the province's previous three-year average.

It is important to note some key items:

- Provincial data in this report is for the entire school year.
- Participation in the Diploma Exams was impacted by the fires in 2022/23. Caution should be used when interpreting trends over time for the province and those school authorities affected by these events.

Key analysis can be found in the tables at the end of this document. Our approach to analysis is as follows:

- First, we compared the school division 2025 result against the division's previous three-year average in both acceptable and excellence standards.
- Second, we compared the provincial 2025 result against the provinces' previous three-year average in both acceptable and excellence standards.
- Third, we compared the school division change factor against the provincial change factor.
